

## Don't know why your kid isn't doing well in school?

*Are learning difficulties coming from an undiagnosed vision problem that is affecting their ability to process vision?*

### Signs your child may have a vision problem that affects school work:

Check the ones that apply.

- Short attention span when reading
- Skips and rereads lines to understand
- Falls asleep during reading or comes home tired
- Holds or covers one eye while reading
- Holds reading too close
- Reads or writes words backward past 2nd grade
- Homework takes hours for a few assignments
- Poor eye-hand coordination or handwriting
- Gets headaches when reading
- Vision is blurry after reading for a long time
- Words move around on the page when reading

### Find out how to help fix your child's vision problem

Join us for a FREE workshop.

You are invited to join a special vision workshop to learn more about how vision affects your child's learning.
